TANZEEL SHAHZAD

Data Analyst | Product & Business Analytics | SQL, Python, Power BI

Karachi, Pakistan | Remote | Available for US Eastern Time overlap
Email: tanzeelshahzad220@gmail.com | Phone: +92 313 1738067
Portfolio: tanz-data.github.io | GitHub: github.com/tanz-data | LinkedIn: linkedin.com/in/tanzeel-shahzad-27b728267

PROFESSIONAL SUMMARY

Data Analyst with 5+ years of combined experience in data analysis and reporting, including 4+ years in dedicated Data Analyst roles. Skilled in SQL (SQL Server, T-SQL) and Python for analysis, KPI tracking, trend analysis and Power BI dashboards that turn raw data into clear decisions for stakeholders. Experienced in ETL data preparation, keeping data accurate and trustworthy, and automating recurring reports. Comfortable using AI assistants to speed up SQL and analysis while validating the outputs. Strong written and spoken English, with experience working directly with stakeholders and remote, cross-time-zone teams.

CORE SKILLS

Analytics and Metrics: KPI monitoring, trend analysis, customer segmentation, dashboards, reporting, stakeholder insights, requirements gathering

SQL and Databases: SQL, SQL Server, T-SQL, complex queries, joins, aggregations, data extraction

Python and Automation: Python (data cleaning, transformation, analysis), workflow automation, Excel (Pivot Tables, VLOOKUP, automated reports)

BI and Modeling: Power BI, DAX, data modeling, Power Query, ETL, multi-source data integration

Data Quality: Data validation, data cleaning, completeness and accuracy checks, anomaly investigation

AI-Assisted Analysis: Writing and explaining SQL and analysis with AI assistants, validating outputs before use

Collaboration: Stakeholder communication, Agile, Jira, Confluence, Slack, Zoom, Trello, remote collaboration

Cloud Platforms: Databricks, Snowflake (hands-on project practice)

PROFESSIONAL EXPERIENCE

Data Analyst | Techevin Pvt Ltd Jan 2023 - Present

- Build and maintain 4-6 Power BI dashboards and monitor KPIs, investigating unexpected changes in the data and tracing them back to their source.
- Gather requirements from business stakeholders and collaborate with cross-functional, cross-time-zone teams using Jira and Confluence.
- Prepare data from multiple operational sources using ETL processes (Power Query, SQL) and troubleshoot data issues to resolve them quickly.
- Automate recurring Excel reports and manual data checks, saving 3+ hours per report and reducing errors across teams.
- Validate datasets of 100,000+ records for accuracy, completeness and consistency using SQL Server queries and Power Query before they feed reporting and stakeholder delivery.
- Apply data quality checks to healthcare-related data to keep reported figures reliable.

Data Analyst | Backoffice Providers May 2022 - Jan 2023

- Analyzed marketing and product-performance data to identify trends and support product and marketing decisions.
- Prepared reports and summaries of findings for stakeholders to support product and marketing decision-making.
- Cleaned and prepared data from multiple sources, resolving missing, duplicate and inconsistent records before analysis.
- Maintained data accuracy and integrity through systematic validation and quality checks before analysis and reporting.
- Worked with team members to clarify reporting needs and keep data consistent across analyses.

Data Operator | Enigma Tech Pvt Ltd Jan 2021 - Apr 2022

- Designed and implemented data validation and data cleaning processes that improved accuracy and consistency.
- Managed and cleaned large, multi-source datasets to ensure data integrity.
- Checked records for duplicates, missing values and formatting errors before handover, and corrected or flagged them.
- Maintained consistent data-entry standards and accuracy across high-volume work.
- Trained 4-6 team members on data handling and quality assurance best practices.

PROJECTS

- **Customer Segmentation (SQL):** Analyzed customer data with SQL queries to identify high-value customer segments.
- **Sales Dashboard (Power BI, DAX):** Built an interactive dashboard tracking revenue, profit and key KPIs on a structured data model with DAX measures.
- **Healthcare Data Validation (SQL, Databricks, Snowflake):** Built SQL checks for completeness, accuracy, data types, relationships and trends on a synthetic healthcare dataset, with a monitoring view for unexpected data changes. GitHub: github.com/tanz-data/healthcare-data-validation
- **Excel Automation Report (Excel):** Automated reporting using advanced Excel formulas to cut manual reporting and checking effort.
- **Executive Sales Report (Power BI, DAX):** Built a report on a star-schema model with DAX measures (revenue vs target, year-over-year, rolling 3 months), a category slicer and target tracking. Sample data.
- **Python Data Cleaning Pipeline (Python, pandas):** Wrote a repeatable script that turns a raw export into a clean file by removing duplicates and fixing dates and amounts, and reports the issues it found. Sample data.

CERTIFICATIONS

- IBM Data Analyst Professional Certificate (In Progress)
- Microsoft Power BI Data Analyst (In Progress)

EDUCATION

- Intermediate, Islamia Govt Commerce College
- Matriculation, Royal Academy
