TANZEEL SHAHZAD

Data Analyst | Data Quality & Validation | SQL • Python • Power BI

Karachi, Pakistan | tanzeelshahzad220@gmail.com | +92 313 1738067 | Remote | Available for US Eastern Time overlap
Portfolio: tanz-data.github.io | GitHub: github.com/tanz-data

PROFESSIONAL SUMMARY

Data Analyst with 5+ years of combined experience in data analysis, data validation and reporting, including 4+ years in dedicated Data Analyst roles. Strong in SQL and Python for data quality checks (completeness, accuracy, data types, relationships and trends), ETL-style data preparation, and monitoring dashboards to catch unexpected data changes. Experienced with healthcare-related data, Power BI (DAX, Power Query) and automating manual validation and reporting workflows. Hands-on project practice with Databricks and Snowflake. Clear written and spoken English, with experience working directly with stakeholders and remote, cross-time-zone teams.

CORE SKILLS

Data Quality & Validation: SQL-based checks for completeness, accuracy, data types, relationships and trends; pre-delivery dataset validation; cleaning messy, multi-source data

SQL & Databases: SQL Server, T-SQL (complex queries, joins, aggregations, data extraction and validation queries)

ETL & Data Pipelines: ETL-style data preparation with Power Query and SQL, multi-source integration, troubleshooting data issues, pipeline output checks

Cloud Data Platforms: Databricks, Snowflake (hands-on project practice); SQL-based validation skills transferable across platforms

Python & Automation: Python (data cleaning, transformation, validation scripts, automation), workflow automation, advanced Excel (Pivot Tables, VLOOKUP, automated reports)

BI & Monitoring: Power BI dashboards, DAX, KPI monitoring, investigating unexpected changes in data, data modeling

Collaboration & Communication: Client and stakeholder communication, requirements gathering, Agile teamwork (Jira, Confluence), remote collaboration (Slack, Zoom, Trello)

PROFESSIONAL EXPERIENCE

Data Analyst — Techevin Pvt Ltd *Jan 2023 – Present*

- Validate datasets for accuracy, completeness and consistency using SQL Server queries and Power Query before they feed reporting and stakeholder delivery.
- Work with healthcare-related data, applying validation and quality checks to keep reported figures reliable.
- Build and maintain Power BI dashboards and monitor KPIs, investigating unexpected changes in the data and tracing them back to their source.
- Prepare data from multiple operational sources with ETL-style processes (Power Query, SQL) and troubleshoot data issues to resolve them quickly.
- Automate recurring Excel reports and manual checks, reducing manual effort and errors across teams.
- Gather requirements from business stakeholders and collaborate with cross-functional, cross-time-zone teams using Jira and Confluence.

Data Analyst — Backoffice Providers *May 2022 – Jan 2023*

- Analyzed marketing and product-performance data to identify trends and support product and marketing decisions.
- Maintained data accuracy and integrity through systematic validation and quality-assurance checks before analysis and reporting.
- Cleaned and prepared data from multiple sources, resolving missing, duplicate and inconsistent records before analysis.
- Prepared reports and summaries of findings for stakeholders to support product and marketing decision-making.
- Worked with team members to clarify reporting needs and keep data consistent across analyses.

Data Operator — Enigma Tech Pvt Ltd *Jan 2021 – Apr 2022*

- Designed and implemented data validation and cleaning processes that improved accuracy and consistency.
- Managed and cleaned large, multi-source datasets to ensure data integrity.
- Checked records for duplicates, missing values and formatting errors before handover, and corrected or flagged them.
- Maintained consistent data-entry standards and accuracy across high-volume work.
- Trained team members on data-handling and quality-assurance best practices.

PROJECTS

- **Healthcare Data Validation (SQL, Databricks / Snowflake):** SQL checks for completeness, accuracy, data types, relationships and trends on a synthetic healthcare dataset, with a monitoring view for unexpected changes. GitHub: tanz-data/healthcare-data-validation
- **Customer Segmentation (SQL):** Analyzed customer data with SQL queries to identify high-value segments.
- **Sales Dashboard (Power BI):** Interactive dashboard tracking revenue, profit and key KPIs, built on a structured data model with DAX measures.
- **Excel Automation Report:** Automated reporting system using advanced Excel formulas to cut manual reporting and checking effort.

CERTIFICATIONS

- IBM Data Analyst Professional Certificate (In Progress) | Microsoft Power BI Data Analyst (In Progress)
